

**“At our oldest location you can definitely see the shelves are cleaner.”**

**Worthington Libraries** (Ohio), is a three branch library system serving a population of over 60,000. Since implementing collectionHQ, collection management tasks at the library have become more efficient; the team has better insight into collection trends; and marketing activities have improved.

**“Selectors have found collectionHQ action plans incredibly useful in pinpointing and identifying selection areas.”**

**Columbus Metropolitan Library** (Ohio) is a 20 branch library system serving a population of over 800,000. Taking on collectionHQ has enabled the team to run evidence based action plans quickly which has greatly improved collection performance by facilitating selection, weeding and promotional activities.

**“Creating a new Collection Management process was part of the most recent GRRL Strategic Plan and the collectionHQ service fit into that plan.”**

With over 30 branches, the team at **Great River Regional Library** (Minnesota) faced the challenge of maintaining a regular and effective weeding program with their ILS system. Thanks to collectionHQ, staff can now systematically weed dead or overused items from the shelves, identify once overlooked items, and synchronize removal with replacement.
